Summary

Creative strategist from a direct-response background. My ad scripts generated seven figures in sales, beat every script from two paid ad agencies and held the top 3 spots in the account for over 3 years. I start with what customers actually say, turn it into personas and angles, write the ads that test them, then read the data to decide what comes next.

Selected Results

- **7 figures in sales from my ad scripts**, which beat every script from two paid ad agencies and held the top 3 spots for 3+ years.
- **\$10–20K back to \$200K a month**: turned around an account with tired angles and the wrong persona. I wrote the new ads and the emails.
- **\$120,000 to over \$1.8 million a year**: growth of a high-ticket consulting offer during my four years in-house.
- **4,000+ calls booked and about \$4.6M in sales** from book-a-call funnels for a high-ticket coach.

Experience

Creative Strategist (Freelance)

DTC brands | 2026 to present

- Creative audits: ad library teardowns, then customer research through reviews, Reddit, forums and organic social.
- Map the personas a brand reaches and misses, and turn the gaps into concepts with hooks, scripts and briefs.
- Scripts for UGC, founder-led ads, mini VSLs and AI animations, plus static ads.
- Spec audits (in portfolio): Stepprs (insoles), First Day (teen supplement), Fresh Clean Threads (T-shirts).

Direct-Response Copywriter & Ad Scriptwriter (In-House)

High-ticket property consulting | May 2022 to May 2026

- Researched and wrote the ad scripts behind the 7-figure result above, and tested new concepts and personas with the media buyer: doubled down on winners, cut the losers.
- Ran email, sales pages and book-a-call funnels. Wrote a Kajabi sales page that stayed the control for a year.
- The offer grew from \$120,000 a year to over \$1.8 million a year.
